SUMMARY

Offensive security professional with OSCP certification and multiple years of hands-on penetration testing and adversary emulation experience across enterprise Active Directory environments, web applications, and network infrastructure. Experienced in simulating real-world threat actor behavior using commercial and custom tooling, authoring technical and executive-level reports, and collaborating with defensive teams to improve detection and response. Currently advancing red team tradecraft through CRTO and OSEP, with a strong foundation in scripting, systems engineering, and applied threat research.

CERTIFICATIONS

Offensive Security Certified Professional (OSCP) - *Achieved*

Comptia Security+ - *Achieved*

Hack the Box Certified Web Exploitation Specialist (CWES) - *Coursework Completed Test Pending*

Certified Red Team Operator (CRTO) - *Coursework In Progress*

Offensive Security Experienced Penetration Tester (OSEP) - *Coursework In Progress*

EDUCATION

Texas A&M University RELLIS — *Bachelor of Science, Computer Science* | Aug 2023

Blinn College — *Associate of Science, Computer Science* | 2019–2020

Texas A&M University — *College of Engineering (Completed Coursework)* | 2011–2012

RELEVANT PROJECTS AND COURSEWORK

OFFENSIVE SECURITY LABS & THREAT EMULATION

Advanced Labs & Continuous Training

- Completed 120+ vulnerable machines across Hack The Box, Proving Grounds, and CTF platforms
- Completed:
 - TryHackMe Junior Pentester & Red Team learning paths
 - Hack The Box CWES learning path
 - Praetorian 10-Stage Cryptography Challenge
- OSCP exam success demonstrating:
 - Independent enumeration and exploitation
 - Time-constrained decision making
 - Professional-grade reporting
- Currently expanding capabilities through:
 - CRTO: C2 infrastructure, beaconing, OPSEC, red team workflows
 - OSEP: Advanced exploitation, custom tooling, AV/EDR evasion
- Architected a virtual enterprise lab using **Proxmox**

- Deployed and attacked:
 - Multi-domain **Active Directory environments (GOAD)**
 - Windows servers, Linux services, web applications
- Practiced:
 - Enterprise credential abuse
 - Lateral movement and domain dominance
 - Detection-aware tradecraft and post-exploitation discipline

IRONSIGHT(Academic Project) - Development of Cyber Range Deployment, Analytics and Management tool that helped Texas A&M students and administration with CS curriculum implementation. Full stack application developed using React, Typescript, Python, SQL and PHP.

3 Axis AI PTZ Camera & Hydra 5 Axis (Hardware Projects) - Engineered and programmed multi-axis control systems using Raspberry Pi, BeagleBone Black, Arduino, and stepper drivers. Integration of AI object tracking, coding in C++ as well as system-level programming with software/hardware integration.

ADDITIONAL EXPERIENCE

CNC Machinist - 3D Distributed

- Worked in safety-critical, high-precision environments
- Developed disciplined troubleshooting and systems-thinking skills

Makerspace Manager - Binary Space

- Led technical operations and training
- Supported multidisciplinary engineering and rapid problem-solving

SPECIALIZED SKILLS

Scripting & Development: Python, Powershell, Bash, C++, Swift, ARM Assembly, SQL, JavaScript, HTML, CSS, React, Java

Tooling: Metasploit, Cobalt Strike, Custom Scripts, Wireshark, Nmap, TCPDump, Burp Suite, John/Hashcat, Responder, Bloodhound, Kerberoasting, Active Directory, Powershell, Nessus

Platforms: Windows, macOS, Linux (Kali, Parrot, Ubuntu, PopOS) | Proxmox, Docker

Fabrication Skills: Operation of lathes and mills, Utilization of G code for CNC machining. tig, mig welding, 3D design and printing, drills, sawing, wiring, soldering, multimeters, oscilloscopes, circuit fab

SPECIALIZED SKILLS

- Experienced in construction and fabrication; applies real-world engineering and problem-solving mindset to offensive security/physical security.
- Texas-based; open to relocation or remote red team opportunities. Eligible for U.S. Government security clearance.
